

Hydraulic powered vacuum lifting machine with a lifting capacity of max. 2000 kg. Fast and precise pick-up and laying of large pavement stones, kerb stones, steel plates etc. The Cosmo is easily operated from the driver's cab. Suction pad can be rotated independently of machine from the driver's cab. Suspended from the dipper arm on an excavator.

Can be fitted with a wide range of vacuum heads for different applications.

**Technical data:**

Lifting capacity:	2000 kg
Vacuum pump capacity:	35 m ³ /h
Required hydraulic data:	20 - 75 l/min., 100 bar
Hydraulic connection, standard:	2 x 1/2" RG quick disconnects
Electrical connection:	12 V cigarette lighter socket, 8 amps
Total height, H:	750 mm
Total width, B:	530 mm
Total length, L:	410 mm
Weight:	70 kg
