

# AL-vac<sup>®</sup> Mantis

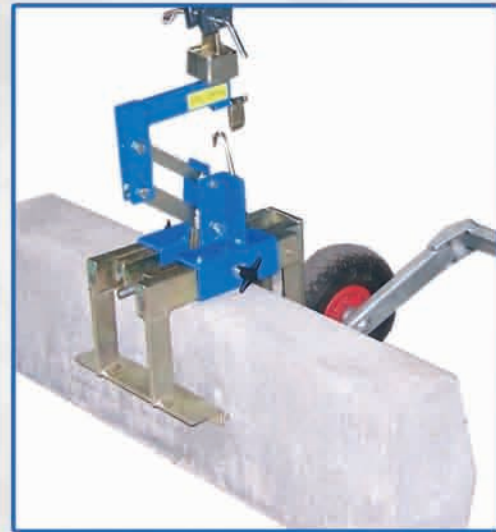

## equipped with kerb stone clamp

**AL-vac<sup>®</sup>** Mantis equipped with mechanical kerb stone clamp is a flexible and easily operated tool for the lifting of kerb stones and stone products. An 80 kg person can easily lift 120 kg kerb stones. The maximum lifting capacity of the **AL-vac<sup>®</sup>** Mantis is 160 kg.

The kerb stone clamp itself is simple in use and with a very efficient grip. The kerb stone clamp is 360° rotatable making it even more flexible.

**AL-vac<sup>®</sup>** Mantis has a lifting height of 750 mm alternatively 1150 mm when equipped with a special lifting arm. Lifting arm and handle is adjustable and even so is the wheel distance.

**AL-vac<sup>®</sup>** Mantis is also available with a battery powered vacuum lifter model Handyman Super.
