

AL-vac[®] Tornado

Hydraulic powered vacuum lifting machine with a lifting capacity of max. 5000 kg. Fast and precise pick-up and laying of large loads. The Tornado is easily operated from the driver's cab. Suction pad can be rotated independently of machine from the driver's cab. Suspended from the dipper arm on an excavator.

Can be fitted with a wide range of vacuum heads for different applications.

Technical data:

Lifting capacity:	5000 kg
Vacuum pump capacity:	60 m ³ /h
Required hydraulic data:	20 – 75 l/min., 120 bar
Hydraulic connection, standard:	2 x 1/2" RG quick disconnects
Electrical connection:	12 V cigarette lighter socket, 8 amps
Total height, H:	1017 mm
Total width, B:	630 mm
Total length, L:	575 mm
Weight:	180 kg
