

The model 1600 and 3500 vacuum lifter has been developed as the ideal, professional tool for simple and easy picking and laying of flag stones, paving slabs, kerb stones and other items in the construction and building branch.

The vacuum lifter can be mounted easily and quickly on all fork based construction machines.

In addition to the obvious time saving, this machine also allows you to achieve a better working environment with higher motivation and the elimination of strain injuries to your employees' backs and limbs.

Powered by diesel or petrol engine, alternatively hydraulic- or electrical powered.

Technical data:

	1600	3500
Lifting capacity	160 kg	350 kg
Reach	7000 mm	7000 mm
Lifting height over forks	1040 mm	
Setting down height under forks	85 mm	

Motor	Petrol	Diesel	Hydraulic	Electro
Motor output	4 kW	3 kW	4,5 kW	2,2 kW
Noise level	83 dB	74 dB	70 dB	70 dB
Weight	360 kg	370 kg	350 kg	350 kg

WE MAKE IT EASY FOR YOU!
