

AL-vac[®] Cargo-Lift

AL-vac[®] has developed its new Cargo-Lift vacuum lifting system for easy installation onto forklift trucks. The unique with the Cargo-Lift system is that it bolts on to almost any type of forklift truck.

AL-vac[®] is the market leader in vacuum lifting equipment for forklift trucks and electric stackers. The **AL-vac**[®] system is used in many different industries typical for order picking in order to increase efficiency and at the same time improve health and safety conditions.

The Cargo-Lift attachment is designed according to the ISO/FEM standard and will fit Class 1, Class 2 and Class 3.

Standard reach is 1500 mm with a working area of 180°. Standard lifting capacity, SWL, is 50 kg. A wide variety of vacuum suction pads is available.

The **AL-vac**[®] Cargo-Lift system is supplied complete with vacuum pump, suction pad and all necessary parts for electrical connection to the forklift truck. Standard systems are for 24 V, 48 V or 80 V.

Upon request the Cargo-Lift can be supplied for hydraulic operation in case of diesel- or gas powered forklift truck.

Contact **AL-vac**[®] for more information.
